

Marx on the increasing organic composition of capital — developing historical self-contradiction

capitalist contradiction:		
<i>bourgeois social relations</i>	vs.	<i>industrial forces of production</i>
3 phases of capital:		
<i>cooperation</i>	<i>manufacture</i>	<i>industry</i>
commodity — object of mediation / exchange / self-contradiction:		
<i>labor</i>	<i>labor-power</i>	<i>labor-time</i>
unsocial sociability	productivity	social crisis of production
specialized division of labor: butcher, baker, brewer, <i>et al</i>	detailed division of labor: assembly-line	machine-production: workers superintend machines
exchange	non-exchange	non-exchange
society as machine	factory as machine	the machine
<i>absolute surplus-value</i>	vs.	<i>relative surplus-value</i>
sweatshops		robots
